### Data in many forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

**Toll-free access** is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres:

Newfoundland & Labrador	Zenith 07037
Nova Scotia, New Brunswick & Prince Edward Island	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1150
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
British Columbia (South & Central)	112-800-663-1551
Yukon & Northern B.C. (area served by Northwestel Inc.)	Zenith 08913
Northwest Territories	Zenith 22015

### How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

### Des données sous plusieurs formes...

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinarolingue et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

Un **service d'appel sans frais** est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres de référence régionaux:

Terre-Neuve et Labrador	Zénith 07037
Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1150
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
Colombie-Britannique (région sud et centrale)	112-800-663-1551
Yukon et le nord de la Colombie-Britannique (région desservie par Northwestel Inc.)	Zénith 08913
Territoires du Nord-Ouest	Zénith 22015

### Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux régionaux de Statistique Canada, ou en écrivant à Ventes et distribution de publications, Statistique Canada, Ottawa, (Ontario), K1A 0V7.

## INTRODUCTION

This report provides the final population counts of the 1981 Census of Canada for all census subdivisions in Canada. All population counts reported for census subdivisions are based on the boundaries in effect on January 1, 1981 provided the information and documentation on these boundaries were in the hands of the census by March 1, 1981. Where information was not received or was received after March 1, 1981 the name, status and/or limits of census subdivisions may not correspond with those recognized by the provinces.

Summaries of CSD changes are available in the form of two bulletins:

- (1) Changes to Municipal Boundaries, Status and Names (Catalogue No. 12-201, Annual); and
- (2) Standard Geographical Classification, 1981, Vol. I (Catalogue No. 12-567, Occasional).

Table 1 presents 1981 population counts for all census subdivisions in Canada ranked in descending order according to their population. Table 2 presents all census subdivisions in alphabetical order indicating the final population count and the national population ranking of each.

It should be noted that the parts of Flin Flon located in Manitoba and Saskatchewan and the parts of Lloydminster located in Saskatchewan and Alberta are treated as separate CSDs.

In 1981, for the first time, each Indian Reserve and unorganized territory is reported separately.

A series of reference maps locating all census subdivisions may be found in another bulletin (Catalogue No. 99-907).

More detailed tables of selected demographic, social and economic characteristics of individuals as well as characteristics of dwellings, households and families will be provided for census subdivisions 5,000 population and over in Volume 3 of the regular 1981 data products series (Catalogue Nos. 95-904 and 95-945).

## INTRODUCTION

Le présent bulletin donne les chiffres de population définitifs du recensement du Canada de 1981 pour toutes les subdivisions de recensement. Tous les chiffres de population fournis sont fondés sur les limites des subdivisions de recensement en vigueur le 1<sup>er</sup> janvier 1981, dans la mesure où ces dernières étaient parvenues au personnel du recensement le 1<sup>er</sup> mars 1981. Si les renseignements relatifs à des modifications de nom, de statut ou de limites de subdivisions de recensement ont été reçus après le 1<sup>er</sup> mars 1981, ou ne nous sont jamais parvenus, il peut arriver que les nom, statut et limites de certaines subdivisions de recensement ne correspondent pas à ceux enregistrés auprès de l'administration provinciale correspondante.

Deux bulletins expliquent sommairement les changements apportés aux SDR:

- (1) Changements de limites, de statut et de nom des municipalités (n° 12-201 au catalogue, publication annuelle)
- (2) Classification géographique type, 1981. Vol. I (n° 12-567 au catalogue, publication hors série).

Le tableau 1 donne les chiffres de population de 1981 des subdivisions de recensement pour l'ensemble du pays par ordre décroissant de population. Le tableau 2 présente toutes les subdivisions de recensement par ordre alphabétique, avec le chiffre de population définitif et son ordre d'importance par rapport à l'ensemble de la population.

Il convient de noter que les parties de Flin Flon situées au Manitoba et en Saskatchewan, de même que les parties de Lloydminster situées en Saskatchewan et en Alberta sont considérées comme des SDR distinctes.

En 1981, pour la première fois, les chiffres correspondant à chaque réserve indienne et chaque territoire non organisé sont présentés de façon distincte.

Un autre bulletin contient une série de cartes de référence permettant de localiser chacune des subdivisions de recensement (n° 99-907 au catalogue).

Des tableaux plus détaillés portant sur certaines caractéristiques démographiques, sociales et économiques des particuliers ainsi que sur les caractéristiques des logements, des ménages et des familles seront fournis pour les subdivisions de 5,000 habitants et plus dans le volume 3 de la série régulière des données du recensement de 1981 (nos 95-904 et 95-945 au catalogue).

## DEFINITIONS

**Province.** Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. In census publications, provincial tables include the Yukon and Northwest Territories.

**Census Subdivision (CSD).** Refers to the general term applying to municipalities, Indian Reserves, Indian Settlements and unorganized territories.

In Newfoundland, Nova Scotia and British Columbia, the term also describes geostatistical areas that have been created by Statistics Canada in cooperation with the provinces as an equivalent for municipalities.

**Census Subdivision Type.** Census subdivisions are classified into various types, according to official designations adopted by provincial or federal authorities. With the exception of unorganized territories and Indian Reserves, the type indicates the municipal status of a CSD. The following list indicates the abbreviations used for the most common CSD types.

BOR	Borough
C	City - Cité
CM	County (Municipality)
COM	Community
CT	Canton (Municipalité de)
CU	Cantons unis (Municipalité de)
DM	District (Municipality)
HAM	Hamlet
ID	Improvement District
LGD	Local Government District
LID	Local Improvement District
LOT	Township and Royalty
MC	Municipal Corporation
MD	Municipal District
PAR	Parish
P	Paroisse (Municipalité de)
R	Indian Reserve - Réserve indienne
RM	Rural Municipality
RV	Resort Village
SA	Special Area
SCM	Subdivision of County Municipality
SD	Sans désignation (Municipalité)
S-E	Indian Settlement - Établissement indien
SET	Settlement
SRD	Subdivision of Regional District
SUN	Subdivision of Unorganized
SV	Summer Village
T	Town
TP	Township
UNO	Unorganized - Non organisé
V	Ville
VL	Village

## DÉFINITIONS

**Province.** Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

**Subdivision de recensement (SDR).** Terme générique qui désigne les municipalités, les réserves indiennes, les établissements indiens et les territoires non organisés.

À Terre-Neuve, en Nouvelle-Écosse et en Colombie-Britannique, l'expression désigne également des unités géostatistiques créées comme équivalents des municipalités et délimitées par Statistique Canada en collaboration avec les provinces.

**Catégorie de subdivision de recensement.** Les subdivisions de recensement sont classées en diverses catégories selon les appellations adoptées par les autorités provinciales ou fédérales. À l'exception des territoires non organisés et des réserves indiennes, la catégorie indique le statut d'une subdivision de recensement. Voici la liste des abréviations des catégories de subdivision de recensement les plus courantes:

## DEFINITIONS - Concluded

For the 1981 Census, all Newfoundland CSDs called Local Government Community (LGC) in 1976 have been changed to Community (COM). In Quebec, all CSDs typed Municipality - Municipalité (MUN) in 1976 have been changed to Cantons unis (CU), Canton (CT), Paroisse (P) or Sans désignation (SD) for 1981. In the Northwest Territories one new CSD type has been added for the 1981 Census; i.e., Settlement (SET).

**Municipality.** Refers to an area with corporate status governed by Provincial and Territorial Acts. These acts differ from province to province. Moreover, municipalities within each province vary in name, status, and administrative powers.

**Indian Reserve.** Refers to territory, mostly rural and varying in size, that belongs to an Indian tribe according to treaties between the Federal Government and the Indians. It is excluded from local jurisdiction and administered by the Federal Department of Indian Affairs and Northern Development.

**Unorganized Territory.** Refers to an area without municipal organization, directly administered by the province or, when applicable, by the county. Such areas are generally characterized by low population density.

**Reference Map.** Refers to a map that identifies and locates the boundaries of census geostatistical areas.

## SAMPLING

The 1981 Census data are collected either on a 100% basis (i.e. from all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 100% basis.

## COVERAGE ERROR

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1976 Census to measure the extent of the bias due to undercoverage. This study estimated the overall undercoverage rate to be of the order of 2% of the total population for persons and 2% for households. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults and recent immigrants. Similar trends were obtained in connection with the 1971 Census.

## DÉFINITIONS - fin

En 1981, toutes les SDR de Terre-Neuve désignées "Local Government Community" (LGC) en 1976 sont devenues des "Community" (COM). Au Québec, toutes les SDR classées comme municipalités (MUN), en 1976, sont devenues des cantons unis (CU), des cantons (CT), des paroisses (P) ou sont sans désignation (SD), en 1981. Les Territoires du Nord-Ouest comportent une nouvelle catégorie de SDR en 1981, le "Settlement" (SET).

**Municipalité.** Territoire constitué en corporation, régi par des lois provinciales et territoriales. Les lois diffèrent d'une province à une autre. De plus, dans chaque province, les municipalités ont des appellations, des statuts et des pouvoirs administratifs différents.

**Réserve indienne.** Territoire, le plus souvent rural et de taille variable, qui appartient à une tribu indienne en vertu de traités conclus entre le gouvernement fédéral et les Indiens. Elle échappe à la compétence des autorités locales et est administrée par le ministère des Affaires indiennes et du Nord.

**Territoire non organisé.** Région sans organisation municipale, administrée directement par la province ou, selon le cas, par le comté. Ces régions sont généralement caractérisées par la faible densité de leur population.

**Carte de référence.** Carte qui délimite et situe les unités géostatistiques de recensement.

## ÉCHANTILLONNAGE

Les données du recensement de 1981 sont recueillies sur une base de 100 % (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis selon la première méthode.

## ERREUR D'OBSERVATION

Il y a erreur d'observation au recensement lorsqu'on oublie complètement une personne ou un ménage ou qu'on le compte plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, de telles erreurs produisent un biais vers le bas dans les statistiques du recensement, de sorte que les estimations publiées du recensement tendent à sous-estimer le chiffre réel de population.

On a entrepris une étude spéciale sur le recensement de 1976 afin d'évaluer le biais entraîné par le sous-dénombrement. Selon les résultats, le taux global du sous-dénombrement serait de toute la population dans le cas des particuliers et de 2 % pour les ménages. L'étude a révélé que le sous-dénombrement est plus élevé dans certains groupes de la population, par exemple chez les jeunes adultes de sexe masculin et les nouveaux immigrants. On avait décelé les mêmes tendances lors du recensement de 1971.

A comparable study was undertaken for the 1981 Census but the results were not available at the time this report was published. The results are included in Data Quality - Total Population (Catalogue No. 99-904) as part of a comprehensive assessment of the quality of the census data.

#### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
  - nil or zero.
- amount too small to be expressed.

Une étude similaire a été entreprise pour le recensement de 1981, mais les résultats n'étaient pas accessibles au moment de la parution du présent bulletin. Ils figurent toutefois dans la publication Qualité des données - population totale (n° 99-904 au catalogue), laquelle constitue une évaluation globale de la qualité des données obtenues au recensement.

#### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
  - néant ou zéro.
- nombres infimes.
